## SUMMARY

Enthusiastic and detail-oriented banking professional with a passion for software development. Adept at leveraging analytical skills from finance to solve complex problems in coding. Committed to continuous learning and seeking an opportunity to contribute to innovative software solutions.

## SUMMARY OF SKILLS

### HTML, CSS, JavaScript:

Proficient in front-end web development with HTML, CSS, and JavaScript.  
Strong understanding of responsive design and cross-browser compatibility.

### React, React-Redux:

Experienced in building dynamic and interactive user interfaces using React.  
Proficient in state management with React-Redux for scalable applications.

### Node.js:

Backend development using Node.js, creating server-side applications and APIs.  
Familiarity with Express.js for building robust and efficient web servers.

### SQL:

Database design and querying using SQL.  
Experience with relational database systems like MySQL.

### Python:

Python programming for various applications, including data processing and scripting.

### PHP:

Proficient in PHP for server-side scripting and web development.  
Experience with popular PHP frameworks for efficient development.

### jQuery:

Familiarity with jQuery for simplifying DOM manipulation and event handling.

### Bootstrap:

Skilled in using Bootstrap for responsive and mobile-first web development.

### Git (Version Control):

Proficient in version control using Git for collaborative software development.  
Experience with branching, merging, and resolving conflicts.

### Deployment (Netlify, Render):

Deployment of web applications using Netlify and Render.  
Understanding of continuous integration and deployment workflows.

## PROJECTS COMPLETED

### Project1-Gazetteer:

#### Description:

A mobile first website that will operate equally well on desktop computers. It will provide profiling for all countries through the presentation of demographic, climatic, geographical and other data extensively using third party APIs.

#### Project Stack:

1. HTML/CSS With Bootstrap Framework
2. JavaScript
3. JQuery DOM manipulation / AJAX
4. PHP cURL

#### Other Resources:

1. Open Cage
2. Open Weather
3. Geonames
4. Rest Countries
5. Open Exchange Rates
6. Leaflet.js

### Project2-Company Directory:

#### Description:

A mobile first website that will operate equally well on desktop computers. The application is generally a database of a company personnel, department and location that allows the user/client creation, retrieval and modification of company personnel (CRUD functionality).

#### Project Stack:

1. HTML/CSS With Bootstrap Framework
2. JavaScript
3. JQuery DOM manipulation / AJAX
4. PHP with JSON encoding / MySQL
